Sayed Amin

San Bernardino, CA | 808 259 1683 | github.com/samin1554

EDUCATION

California State University, San Bernardino Expected Spring 2028
B.S. in Computer Science & Mathematics | GPA: 3.4

EXPERIENCE

Software Engineering Intern June 2026 – July 2026
Murphy USA (Fortune 500) *El Dorado, AR*

- Built a C#/.NET integration solution from scratch to replace legacy SnapLogic pipelines, developing internal financial tooling used by the Financial Systems team to process 10K+ invoices, purchase orders, and transactions monthly
- Engineered validation queries against IBM i (AS400) DB2 tables across 3 databases to identify incorrect POs across systems, enabling the business to proactively resolve 500+ inaccurate customer records
- Redesigned an automated JD Edwards Orchestrator workflow with 12 custom and sub-orchestrations, writing smart validation logic in JRuby/Ruby on Rails to abstract corrupted and blank data and surface clearer logs for end users, cutting manual data cleanup by 6 hrs/week
- Built an Azure DevOps CI/CD pipeline in YAML that automatically generates user-story tickets for bugs and triggers automated test runs on every push, saving ~5 hrs/week of manual QA

Undergraduate Research Assistant 2025 – Spring 2026
Southern Arkansas University *Magnolia, AR*

- Conducted comparative computer vision research benchmarking VGG16, ViT, ChatGPT, and Claude on a 4-class image classification dataset of 12,000+ images, evaluating models using IoU and accuracy metrics; top model achieved 92% accuracy

Research Assistant May 2024 – July 2024
University of Hawai'i Cancer Center *Honolulu, HI*

- Built Python pipelines to scrape and process 5K+ TikTok posts on oral nicotine products, engineering validation logic that ensured 99% data consistency across 4 heterogeneous sources, eliminating ~10 hrs/week of manual review

PROJECTS

OpenBook — NotebookLM Clone | *Java, Spring Boot, FastAPI, React, TypeScript, pgvector, RabbitMQ, MinIO, Docker, Stripe*

- Architected a 6-service Java/Spring Boot microservices platform for RAG-powered document Q&A (pgvector + LLaMA 3.3 70B), handling 1,000+ documents with p95 query latency under 3s
- Built event-driven RabbitMQ messaging, async podcast generation (15-min audio from 50-page documents), and Stripe subscription billing

TechGenie — AI Career Toolkit | *Next.js, TypeScript, React, FastAPI, PostgreSQL, OAuth2, Stripe, Vercel, Railway*

- Built a full-stack SaaS platform used by 200+ users, with a RESTful API backend, JWT auth, GitHub/Google OAuth2, Stripe billing, and PostgreSQL JSONB caching across distributed infrastructure
- Integrated the JSearch API to surface real-time job listings from LinkedIn, Indeed, and Glassdoor, with 5,000+ listings and sub-2s response times

Life OS — Multi-Agent AI System | *Next.js, FastAPI, LangGraph, PostgreSQL, ChromaDB, Redis, Clerk*

- Architected a 12-agent LangGraph orchestration system with ChromaDB semantic memory, Gmail OAuth integration, and BYOK support across 9 LLM providers, executing 500+ multi-step tasks with a 95% completion rate
- Built file generation capabilities (DOCX, XLSX, PDF), with 150+ documents generated

OPEN SOURCE

- Notte — designed and implemented prefix-based model validation for LLM provider integration, addressing a maintainer-identified architecture gap (repo: 1K+★)

- Hermes Agent (Nous Research) — added a semantic-scholar research skill covering 9 API endpoint types, closing a documented gap in the existing arxiv skill
- JavaScript Mastery Pro — fixed a missing await on a Mongoose findOneAndUpdate call causing an unresolved Promise in a POST handler (merged into a 20K★ repo)

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, C#, Go
Frameworks: Spring Boot, React, Next.js, FastAPI
Backend & Systems: REST APIs, Microservices, Distributed Systems, OAuth2, JWT, Event-Driven Architecture, CI/CD
Databases & Infrastructure: PostgreSQL, MongoDB, Redis, Docker, RabbitMQ, Azure DevOps, GitHub Actions
AI/ML: PyTorch, TensorFlow, LangGraph, Transformers

CERTIFICATIONS

- AI Fluency for Builders — Anthropic | Claude Code in Action — Anthropic | Fundamentals of Agents — Hugging Face | SWE Intern Certification — HackerRank
