Sayed Amin

San Bernardino, CA | 808 259 1683 | github.com/samin1554

EDUCATION

University of California, San Bernardino Expected 2027–2028
B.S. in Computer Science & Mathematics | GPA: 4.0

EXPERIENCE

Software Engineering Intern June 2026 – July 2026
Murphy USA (Fortune 500) *El Dorado, AR*

- Built a C# / .NET integration solution from scratch to replace legacy SnapLogic pipelines, developing internal financial tooling used by the Financial Systems team to process invoices, purchase orders, and transactions
- Engineered validation queries against IBM i (AS400) DB2 tables across multiple databases to identify incorrect POs across systems, enabling the business to proactively resolve inaccurate customer records
- Redesigned an automated JD Edwards Orchestrator workflow with custom and sub-orchestrations, writing smart validation logic in JRuby / Ruby on Rails to abstract corrupted and blank data and surface clearer logs for end users
- Built an Azure DevOps CI/CD pipeline in YAML that automatically generates user story tickets for bugs and triggers automated test runs on new code pushed to the C# codebase

Undergraduate Research Assistant 2025 – Spring 2026
Southern Arkansas University *Magnolia, AR*

- Conducted comparative computer vision research benchmarking VGG16, ViT, ChatGPT, and Claude on a 4-class image classification dataset, evaluating models using IoU and accuracy metrics

Research Assistant May 2024 – July 2024
University of Hawai'i Cancer Center *Honolulu, HI*

- Built Python pipelines to scrape and process 5K+ TikTok posts on oral nicotine products, engineering validation logic that ensured 99% data consistency across heterogeneous sources

PROJECTS

OpenBook — NotebookLM Clone | *Java, Spring Boot, FastAPI, React, TypeScript, pgvector, RabbitMQ, MinIO, Docker, Stripe*

- Architected a 6-service Java/Spring Boot microservices platform for RAG-powered document Q&A (pgvector + LLaMA 3.3 70B), event-driven RabbitMQ messaging, async podcast generation, and Stripe subscription billing

TechGenie — AI Career Toolkit | *Next.js, TypeScript, React, FastAPI, PostgreSQL, OAuth2, Stripe, Vercel, Railway*

- Built and deployed a full-stack SaaS platform at techgenie.cc with a RESTful API backend, JWT auth, GitHub/Google OAuth2, Stripe billing, and PostgreSQL JSONB caching across distributed infrastructure
- Integrated the JSearch API to surface real-time job listings from LinkedIn, Indeed, and Glassdoor, delivering an end-to-end job search experience within the platform

Life OS — Multi-Agent AI System | *Next.js, FastAPI, LangGraph, PostgreSQL, ChromaDB, Redis, Clerk*

- Architected a 12-agent LangGraph orchestration system with ChromaDB semantic memory, Gmail OAuth integration, and BYOK support across 9 LLM providers
- Built file generation capabilities (DOCX, XLSX, PDF) and deployed the full stack on Railway + Vercel

OPEN SOURCE

- Notte — designed and implemented prefix-based model validation for LLM provider integration, addressing a maintainer-identified architecture gap
- Hermes Agent (Nous Research) — added a semantic-scholar research skill covering 9 API endpoint types, closing a documented gap in the existing arxiv skill
- JavaScript Mastery Pro — fixed a missing await on a Mongoose findOneAndUpdate call causing an unresolved Promise in a POST handler (merged)

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, C#, Go
Frameworks: Spring Boot, React, Next.js, FastAPI
Backend & Systems: REST APIs, Microservices, Distributed Systems, OAuth2, JWT, Event-Driven Architecture, CI/CD
Databases & Infrastructure: PostgreSQL, MongoDB, Redis, Docker, RabbitMQ, Azure DevOps, GitHub Actions
AI/ML: PyTorch, TensorFlow, LangGraph, Transformers

CERTIFICATIONS

- AI Fluency for Builders — Anthropic | Claude Code in Action — Anthropic | Fundamentals of Agents — Hugging Face | SWE Intern Certification — HackerRank
